

TRUTH OR NEW MEXICO CONSEQUENCES

Water system notice regarding the precautionary, boil for water advisory for the city of Truth or Consequences.

If you experienced a water outage on August 31, 2026, between 1:30 PM and 5:00 PM, or a low-pressure situation during that time, the New Mexico Environment Department has advised that you boil your water before consuming it.

Extremely low pressure and no pressure occurrences such as those experienced during this water outage may increase the likelihood of microbial contamination within the distribution system. Although no contamination has currently been detected as a result of this water outage or low-pressure situation, customers in Truth or Consequences are still encouraged and recommended to boil their water until further notice.

The City of Truth or Consequences will be sending out water samples for testing on Wednesday, September 2nd, 2026. Per the New Mexico environment department, following a negative test result, the boiling recommendation will be lifted.

This advisory remains in effect until further notice from the City of Truth or Consequences and the New Mexico Environment Department.
