

Big Improvement Coming to Ralph Edwards Park!

We're thrilled to share some exciting news: TorC has been awarded a New Mexico Economic Development Grant to enhance Ralph Edwards Park!

As part of this initiative, a new shade structure will be installed over the playground—making it a more comfortable and enjoyable space for families, even on sunny days.

Construction begins: August 4

Estimated completion: September 5 (pending final inspection)

Playground closed during construction

Thanks for your patience as we work to make our park even better for our community!

Voter Information Page Launches Ahead of Fall Election

The City of Truth or Consequences has launched a new voter information page to help residents prepare for the upcoming Fall 2025 Municipal Election. This resource is designed to provide clear, accessible information about voter registration, deadlines, and how to participate. These positions play a vital role in shaping local policy, overseeing city services, and representing the interests of our community. Your vote helps determine the future of Truth or Consequences—make sure you're ready to participate! Visit torcnm.org/voter for up to date information.

Follow the Flow: A Quick Look at Cantrell Dam

Ever wonder where rainwater goes after it runs away from Mud Mountain? We followed its likely path—from the base of Cantrell Dam, through towering drainage tubes, and into a massive tunnel that carries water beneath Interstate 25.

Our latest video doesn't dive into technical details or infrastructure specs, but it does offer a fun and rare look at this hidden part of BLM land that affects our city's drainage system. With help from the Streets Department, we captured the sights of the dam, the tunnel, and the natural marks left behind by recent storms.

Watch the video on our YouTube channel for a short, behind-the-scenes tour of Cantrell Dam and the surrounding drainage system.

Curious? Visit our City Blueprint webpages to learn more about the proposed engineering project calling for a breach of the dirt structure, along with the timeline of completion and financial considerations.
